OAuth2 Magento 2 Extension UPS Shipping Integration

Allowed Methods: You can choose the delivery method you want to show to your customers based on your **“Origin of the Shipment”**.

NOTE: Most of the settings are the same as the default UPS extension of Magento 2.

Step 3:

Save Configuration:

After completing the configuration Click on the Save Config Button at the top right corner.

The screenshot shows a configuration interface with a white background. At the top right, there is an orange button labeled "Save Config". Below the button, there are three rows of configuration options. Each row consists of a text input field, a dropdown arrow, and a checkbox labeled "Use system value". The first row has an empty input field and an unchecked checkbox. The second row has a greyed-out input field and a checked checkbox. The third row has a greyed-out input field and a checked checkbox. At the bottom left, there is a small text label "Users to test their" followed by a list of names.

Flush Cache:

Flush the Cache after saving the configuration and you are all set to use the UPS Shipping Method with your new API keys of OAuth 2.0.
